

Practical Life

Activity: Unrolling and Rolling a Floor Mat

After any floor activities, Videll will need to roll a floor mat and put it away. He is able to roll the mat quite well. This activity will help with his coordination of movement, development of muscles and concentration.

Sensorial

Activity : The Sound Boxes

This material helps Videll to refine his auditory sense.

This activity will help Videll discern different sounds when he learns phonics at a later stage. At present, he will need more time with the material. He still needs to organise the steps and sequence the process when using this material.

Language

Activity : Puzzles

Videll enjoys working with the different puzzles on the shelves. Here, he is able to identify and name some of the vehicles e.g. 'train', 'aeroplane' and 'car'. Puzzles are fun ways to help young children develop hand-eye coordination and problem solving skills.

Mathematics

Activity : Puzzle

Videll enjoys working with this puzzle. He is still trying to fix the pieces into the right places. With more practices, he will be able to perfect the skill. This activity helps in the visual identification of numbers and sequential counting as well as development of fine motor skill.

Cultural

Activity : Zoology (Names of the farm animals)

One of the toddlers' milestone is understanding speech and its concept. Working with this activity, Videll will be able to identify and name the farm animals. At present, he likes standing them on the mat and, at times, making sounds. He will need more time with this material.

Prata Journey

Activity: Field Trip

Field trips are experiences many students get to have when they are in school. Field trips can also broaden cultural horizons. Depending on the trip itself, the main objective is typically educational. Videll enjoyed this field trip. He also had hands-on experience on making the prata. Finally, he got to eat the prata with a cup of milo.
